TRADING JOURNAL · TRADE REPLAY · AI COACH

Know why you win. Stop repeating why you lose.

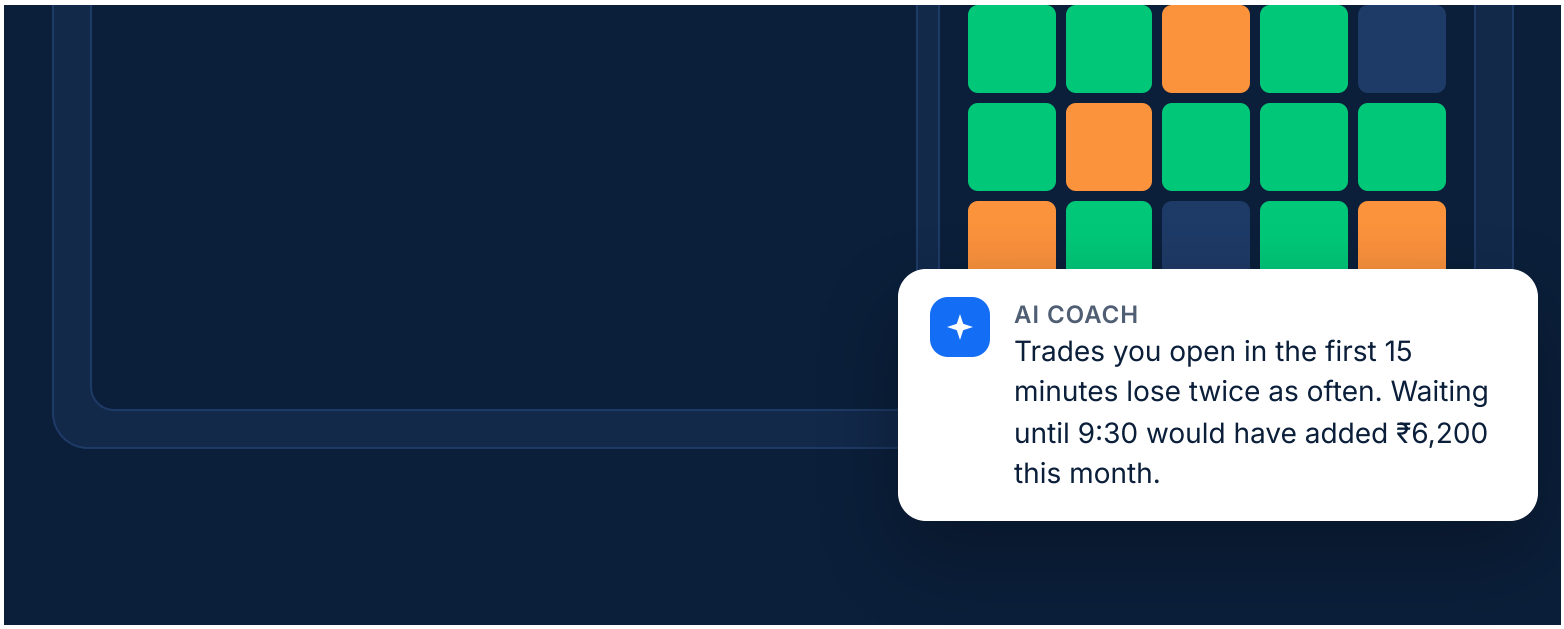

Import your broker statements, see every trading day on one calendar, replay any trade on the chart, and get a coach that reads your whole history and tells you what to change on Monday.

Import statements from **Groww** **Zerodha** **Binance** **Exness**

and any CSV, with AI column mapping

HOW IT WORKS

Three steps from a messy statement to a clear plan

Step 1

Import

Drop in a broker statement or add trades by hand. Charges, taxes and dividends are matched to the right trades automatically.

Step 2

Review

Your calendar, reports and trade replay show where the money came from and where it went, by symbol, setup, weekday and hour.

Step 3

Improve

The AI coach turns patterns into a short list of rules. Your risk plan checks every new trade against them.

SEE IT WORKING

Every feature in an 8-second clip

Pick a feature to play its clip. Clips are drawn live from the real interface, so they stay sharp on any screen and always match the current app.

P&L calendar | Trade replay | AI coach | Statement import | Journal and tags | Risk plan

See every trading day at a glance

Profit and loss by day with weekly totals. Click any day to open its trades, notes and charts.

- Colour strength shows the size of the day
- Weekly totals in the last column
- Filter by account, symbol or tag

AI COACH

Ask about your trading in plain words

The coach reads every trade, note and tag you have, then answers with numbers from your own history. It suggests rules you can add to your plan in one tap.

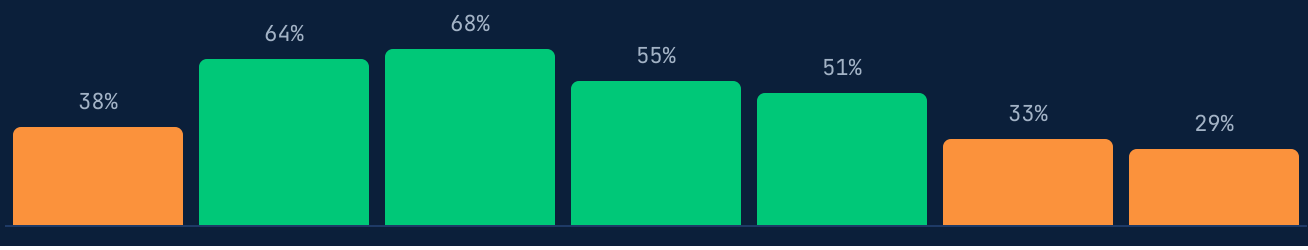

- Weekly review written for you every Saturday
- Auto-tags setups and mistakes on import
- Price outlook from a forecasting model trained on market candles

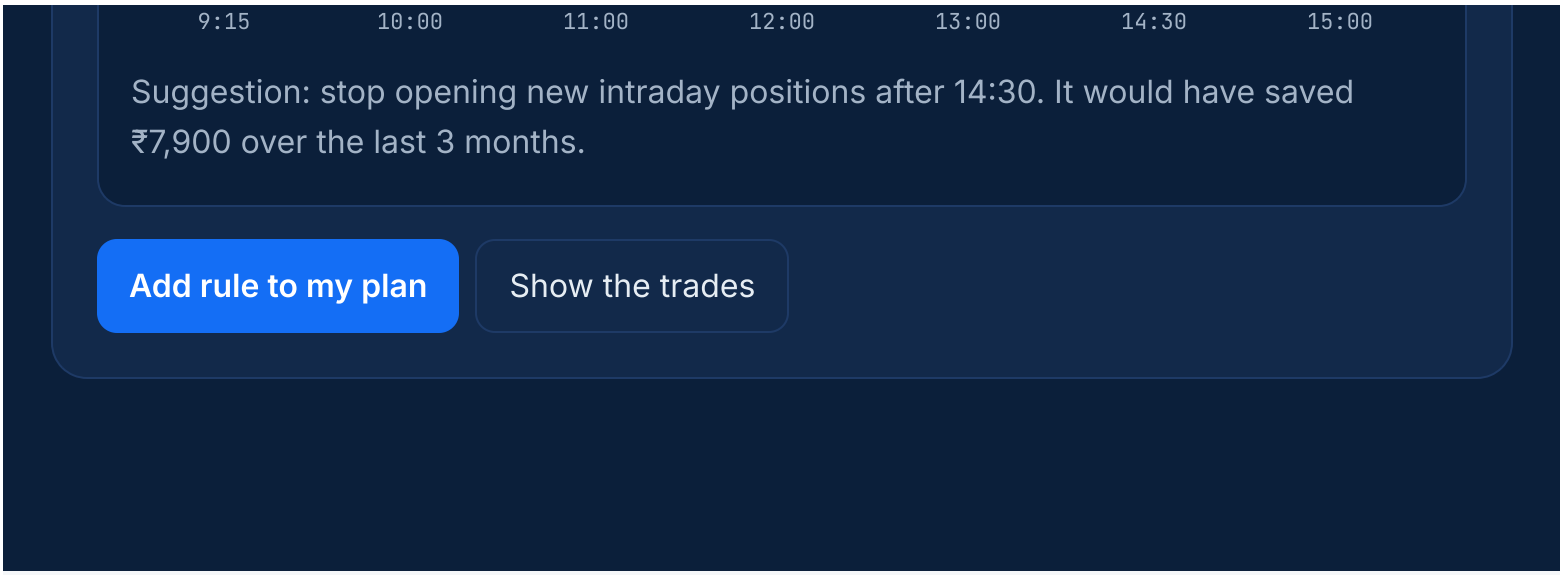

Educational insights from your own data. Not investment advice.

Coach · example conversation · sample data

At what time of day do I trade best?

Your win rate peaks between 10:00 and 11:30, and drops sharply after 14:30.

BUILT FOR TODAY

Fast, private and ready on every screen

One-tap sign-in with passkeys

Use your fingerprint, face or phone screen lock. Passkeys can't be phished or reused, and you never type a password on a shared computer.

Live prices

Open positions update in real time, without refreshing the page.

Install it on your phone

Add the app to your home screen and get alerts when you break a rule in your plan.

Your data stays yours

Encrypted, stored in our own infrastructure, and deleted when you ask. We never sell trading data.

Pages that open instantly

Server-rendered pages, cached data and lightweight charts keep the app fast even on a mid-range phone and a slow connection.

GET STARTED

Sign in the way you like

Create an account with a user ID and password, or continue with Google. After your first sign-in, turn on a passkey or a device PIN for one-tap access.

- `Passkey` Fingerprint, face or screen lock. Fastest and safest.
- `Google` Any Gmail or Google Workspace account.
- `Device PIN` 6 digits, works only on a device you trust. Trades and withdrawals still ask for your password or passkey.
- `2-step` Authenticator app codes for money and trading actions.
